DETAILED ACTION

In response to Amendments/Remarks filed 02/13/2009, Claim(s) 1-6, 13-20, 22-25, 39-44, 48-61 and 63-69 are allowed.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Allowable Subject Matter

The prior art made of record:

- | | | |
|--------------------|-------------|------------------|
| ➤ US 20030159112A1 | FRY | Filed 11/26/2002 |
| ➤ US 20050039124A1 | CHU, et al. | Filed 05/31/2001 |

❖ Claim(s) 1-6, 13-20, 22-25, 39-44, 48-61 and 63-69 are allowed:

The following is a statement of reasons for the indication of allowable subject matter:

Interpreting the claims in light of the specification, Examiner finds the claimed invention is patentably distinct from the prior art of record, which set forth in the followings:

- FRY teaches a streaming XML parser that is capable of instantiating an API that is appropriate for the XML document being parsed and the receiving application. (See FRY, paragraph [0016].) Also FRY further teaches the APIs that can be instantiated are: (1) streaming parser API that does not validate; (2) streaming parser API that does not validate, but which can read information for the XML document being validated from a DTD or an XML schema; and (3) streaming parser API that can validate an XML document against a DTD or an XML schema. (See FRY, paragraph [0017] and illustrates at figure(s) 1-3.

- CHU teaches a parser that can validate an XML document against a first schema and generate output that conforms to a different, second schema, at figure 4 and at paragraphs [0026-0027] and at figure 9.

Under the broadest reasonable interpretation of the claimed limitation, which is consistent with the Applicant's Specification, and, as argued by Applicant in the Response dated 02/13/2009, the prior art fails to teach every limitation recited in Claims 1, 39 and 48. Specifically, the prior art fails to disclose or suggest an XML processor that, after the XML processor starts to **validate** a particular XML element but before the XML processor **completes** validating the particular XML element, performs the following functions: 1)

Art Unit: 2176

receives requests for particular information relating to a validation operation; 2) generates messages that include the particular information; and 3) responds to the requests for the particular information by providing messages [see figure 2 and the currently amended independent claims 1, 39 and 48 at page(s) 2, 7 and 8-9 of the amendment filed 02/13/2009.]

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
